SUMMARY

Third-year B.Tech student in Mathematics & Computing with strong analytical and problem-solving skills and a growing interest in **Artificial Intelligence, Machine Learning** and **Data Science**. Experienced in **Python, SQL, MATLAB**, and data analysis through internships and academic projects. Passionate about applying AI-driven solutions to real-world challenges while continuously learning emerging technologies.

EDUCATION

Bachelor of Technology in Mathematics & Computing

Madhav Institute of Technology and Science, Gwalior

CGPA : 8.50

Expected May 2028

TECHNICAL SKILLS

Languages : C, C++, Python, SQL

Frontend : HTML, CSS, JavaScript, React.js

Backend : Firebase(Realtime Database, Authentication), Node.js

Database: MySQL, MongoDB

Data Science: Pandas, NumPy, Scikit-learn, Data Preprocessing, Exploratory Data Analysis (EDA), Statistical Testing

Tools: Git, GitHub, VS Code, MS Excel, MATLAB, Power BI, Jupyter Notebook, Google Colab

PROJECTS

Your Own Library of Mathematical Functions

(C Programming, Numerical Methods)

- Created a custom mathematical library implementing trigonometric, logarithmic and hyperbolic functions without using standard libraries.
- Applied Taylor and Maclaurin series to achieve accurate numerical computation.
- Validated results against standard library outputs to ensure correctness and numerical precision.

Modeling Signal Modulation and Demodulation using MATLAB

(MATLAB, Signal Processing, Communication Systems)

- Simulated amplitude modulation and demodulation techniques to model a basic communication system.
- Analyzed signal behavior under varying sampling frequencies and noise conditions.
- Evaluated recovered signals using visualization and signal processing techniques.

Airport Runway Scheduling and Simulation

(HTML, CSS, JavaScript, Simulation, Scheduling Systems)

- Built a simulation-based runway scheduling system to optimize flight allocation and minimize operational conflicts.
- Integrated emergency handling and priority-based scheduling to improve resource utilization.
- Visualized flight status, runway usage, and scheduling events through an interactive dashboard.

Cryptography-Based Secure Student Management System

(MySQL, Cryptography, Database Management)

- Built a secure student record management system with authentication and role-based access control.
- Applied cryptographic techniques to protect sensitive student information and strengthen data confidentiality.
- Integrated a MySQL database for efficient record storage, retrieval, and management.
- Ensured data integrity and secure access through encryption and database security principles.

CareerLens AI | AI-Powered Career Recommendation System

(Python, Machine Learning, NumPy, Pandas, Jupyter Notebook)

- Built an AI-powered career recommendation system to suggest personalized career paths based on users' skills, education, interests, and academic profile.
- Performed data preprocessing, feature engineering, and exploratory data analysis (EDA) to prepare datasets for machine learning.
- Trained and evaluated Random Forest models to generate personalized recommendations and identify key features influencing career predictions.
- Integrated career comparison, skill-gap analysis, and roadmap features to support data-driven career planning.

PROFESSIONAL EXPERIENCES

AI / Machine Learning Intern

Edunet Foundation

May 2026 – June 2026

- Built an **AI Resume & Portfolio Builder** that generates ATS-friendly resumes and portfolio content using **Python, Flask, and OpenAI API** based on user-provided information.
- Integrated AI-powered content generation with a web-based interface to automate resume creation and reduce manual effort.
- Applied prompt engineering, input validation, and backend processing to generate structured, personalized, and professional resume content.
- Collaborated with mentors during the project lifecycle while strengthening practical skills in **Artificial Intelligence, Python, Flask, and NLP-based applications**.

Mathematics Club, MITS Gwalior, Graphics Designer

Sept 2025-Present

- Designed posters, banners, and digital creatives for club events and competitions using design tools.
- Collaborated with team members to create visually engaging content to promote mathematical activities.

Soft Computing Research Society, MITS Gwalior, Social Media Head

Aug 2025- Present

- Managed and grew the society's social media presence by creating and scheduling engaging content.
- Designed and published posts to promote events, workshops, and research activities.

CERTIFICATIONS

Introduction to Data Science

Infosys Springboard

DevQuest 2026

Frontend, Programming & DSA Challenge – (4th Rank Holder)

HackVento 2K26 – Hackathon Participation

GDG On Campus (IET DAVV) | Collaboration, Problem Solving, Innovation
